

PCA Club Racing Porsche Cayman GT4 Clubsport Trophy East Teams and Competitors

Vol. 1, Issue No. 6, Sept. 23 2016

News from Series Director F. Allen Shirley:

Overheating Issue:

First, I would like to thank everyone again for your patience in allowing us to assist in finding the cause of the overheating issue with your GT4CS, as well as the potential solution.

To be clear, the problem is not just in the Trophy East Series but out west as well. The overheating issue has not surfaced with all cars, east or west. It did, however, reach a high enough level of concern such that everyone desired the issue be immediately addressed.

Once the problem was identified, PMNA methodically went about finding a solution to the issue. PAG sent a factory tech from Germany to collect data and provide an initial analysis at Sonoma two weeks ago. The collected data was sent to Germany for further evaluation.

PMNA, in collaboration with PAG, are now in the final stage of addressing the solution and believe the best way to provide this information is directly to the Trophy East teams and drivers. They would like to have a conference call at the end of next week to lay out what they have discovered and provide information on a recommended solution.

I will get the word out to everyone next week as soon as a time for the call has been determined. I can assure you there will be ample time prior to Daytona to allow for implementation of their recommendations.

Thank you,

Allen Shirley
